

Department of Transportation

Deployment of ITS Projects in Pasadena – A Local Agency Perspective

ITS California Annual Meeting

October 2, 2013

Norman Baculinao, PE

Pasadena and the Region

Department of Transportation

PASADENA

Introduction

Department of Transportation

- Pasadena ITS Brief Timeline
- Funding Streams
- Master Plans
- Leveraging Existing Policies, Environment
- Ongoing issues and Lessons Learned

1991 – Pasadena TMC Created

Department of Transportation

- TWP network/Series 2000 Central TCS and

PASADENA

1994 – CCTV, CMS and HAR

Department of Transportation

- 10 CCTV
- 6 Fixed CMS
- 2 Portable CMS
- Highway Advisory Radio (HAR)

2003 – Fiber Optic Deployment

Department of Transportation

- Fair Oaks Ave and Arroyo Parkway
- Metro Gold Line – QuicNet TCS
- IEN (for Series 2000 TCS)

PASADENA

2007 – I-710 Rogan Bill

Department of Transportation

- i2 Central System
- Additional Fiber Deployment

Current TMC Console

Department of Transportation

Current ITS Deployment

Department of Transportation

- Over 25 miles of fiber
- 4 Central Traffic Control Systems (all on the IEN)
- 31 CCTV Cameras
- 5 Fixed CMS (6 legacy CMS no longer operational)
- SMART Signal Pilot
- Transit Vehicle Arrival Information System
- Bluetooth Pilot
- SCATS Adaptive System on Fair Oaks Ave
- Video Detection (65 intersections)
- System Detection (80 intersections)

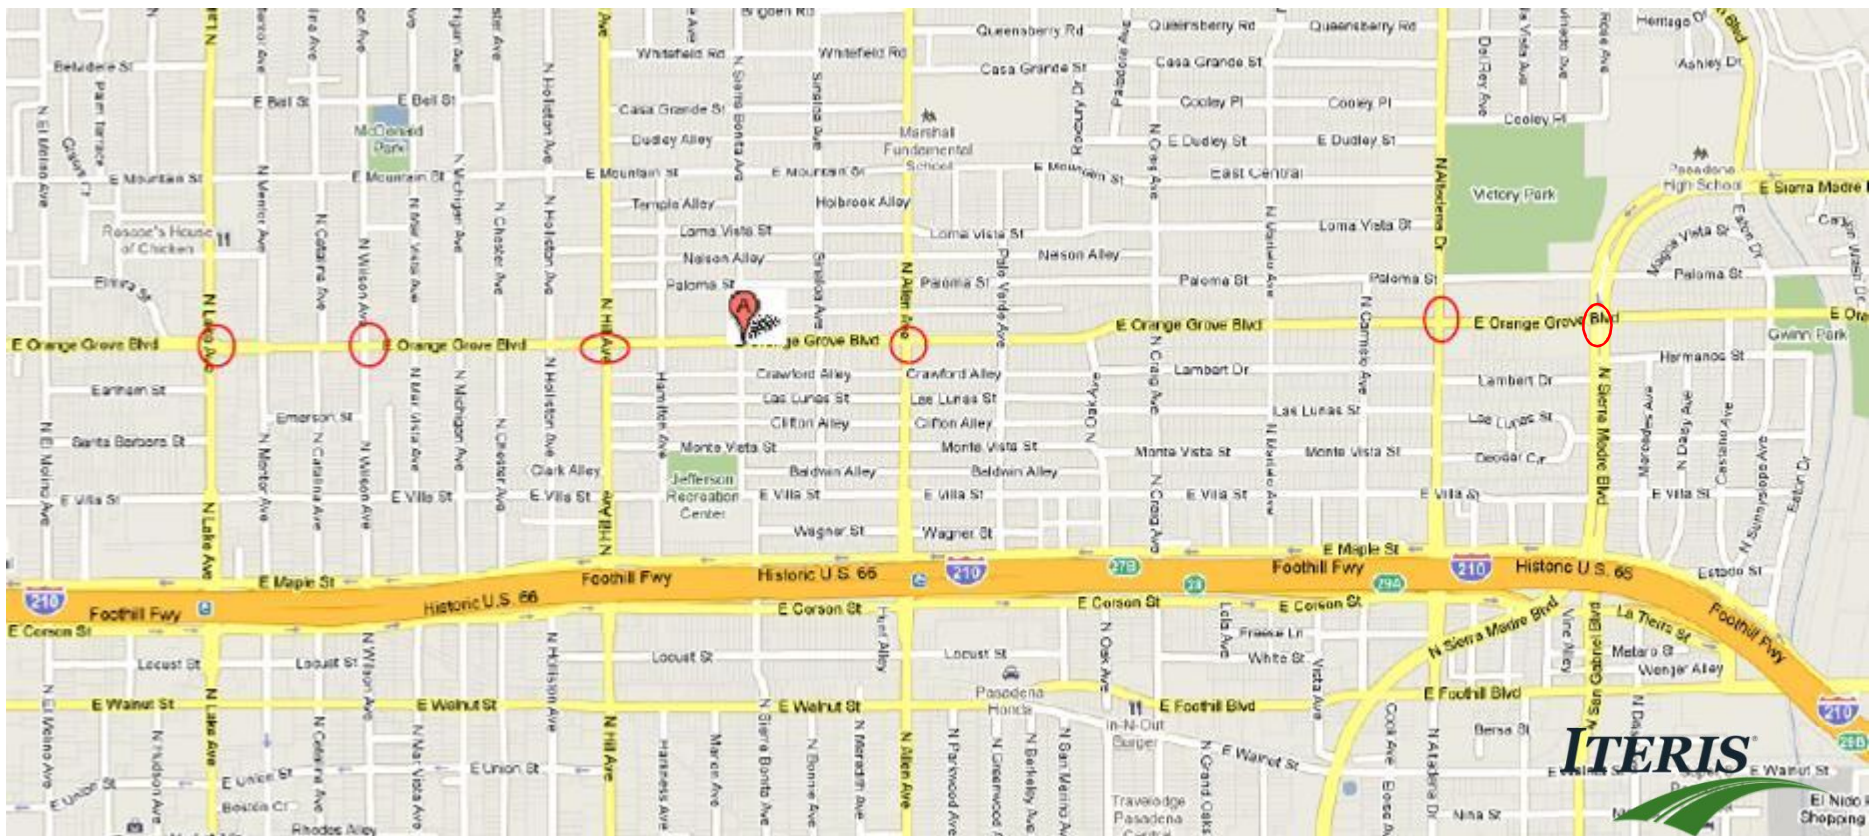

SMART Signal Pilot

UNIVERSITY OF MINNESOTA
Smart Signal

Department of Transportation

- Installation of SMART-Signal system at six intersections along Orange Grove Boulevard in Pasadena, CA in early 2011

PASADENA

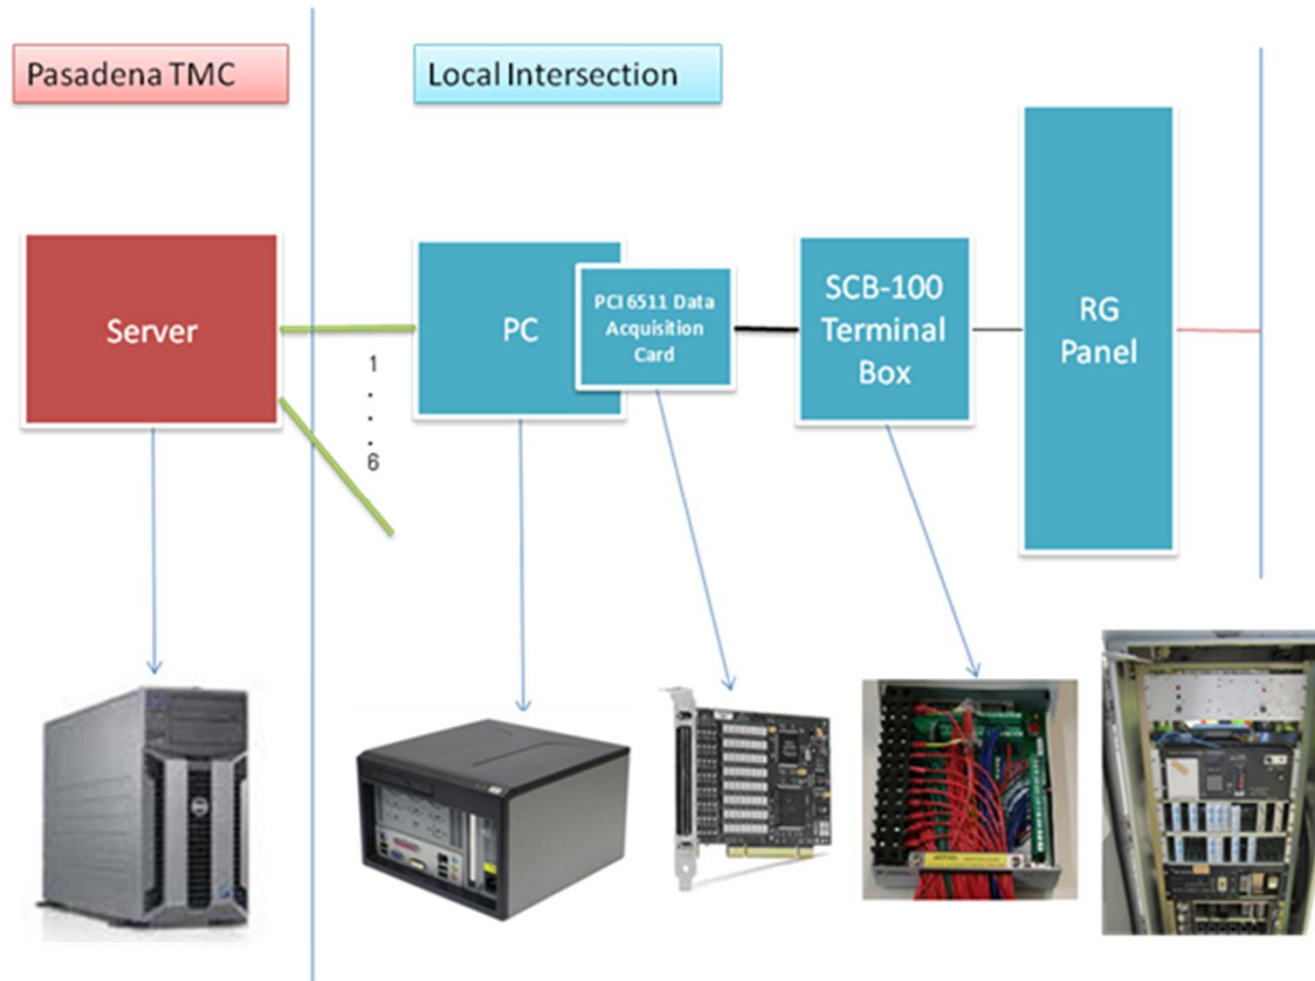

Infrastructure

UNIVERSITY OF MINNESOTA
Smart Signal

Department of Transportation

ITERIS

PASADENA

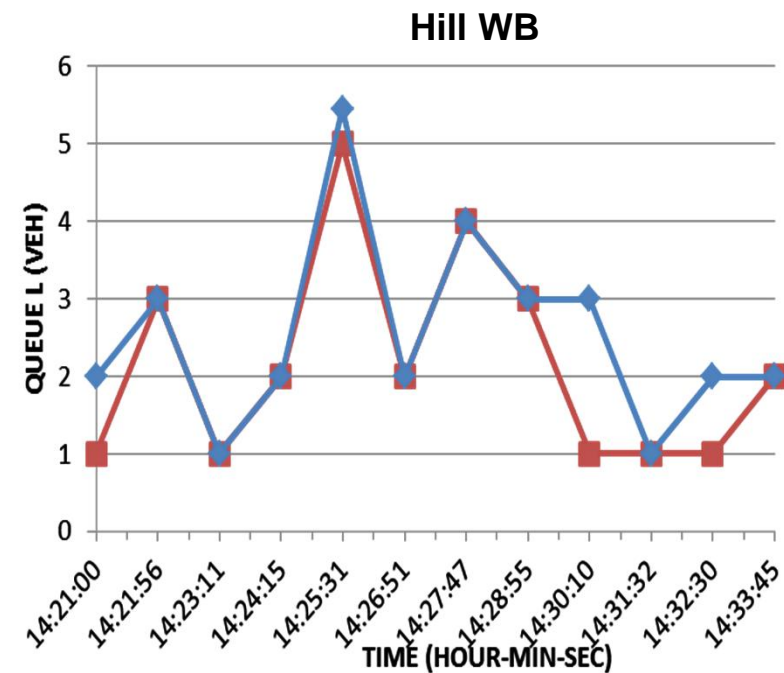

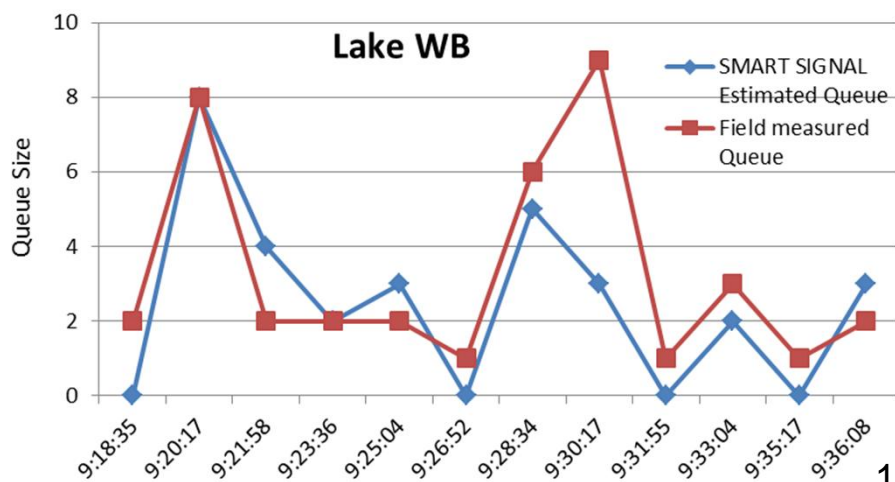

Queue Results

UNIVERSITY OF MINNESOTA

SCATS

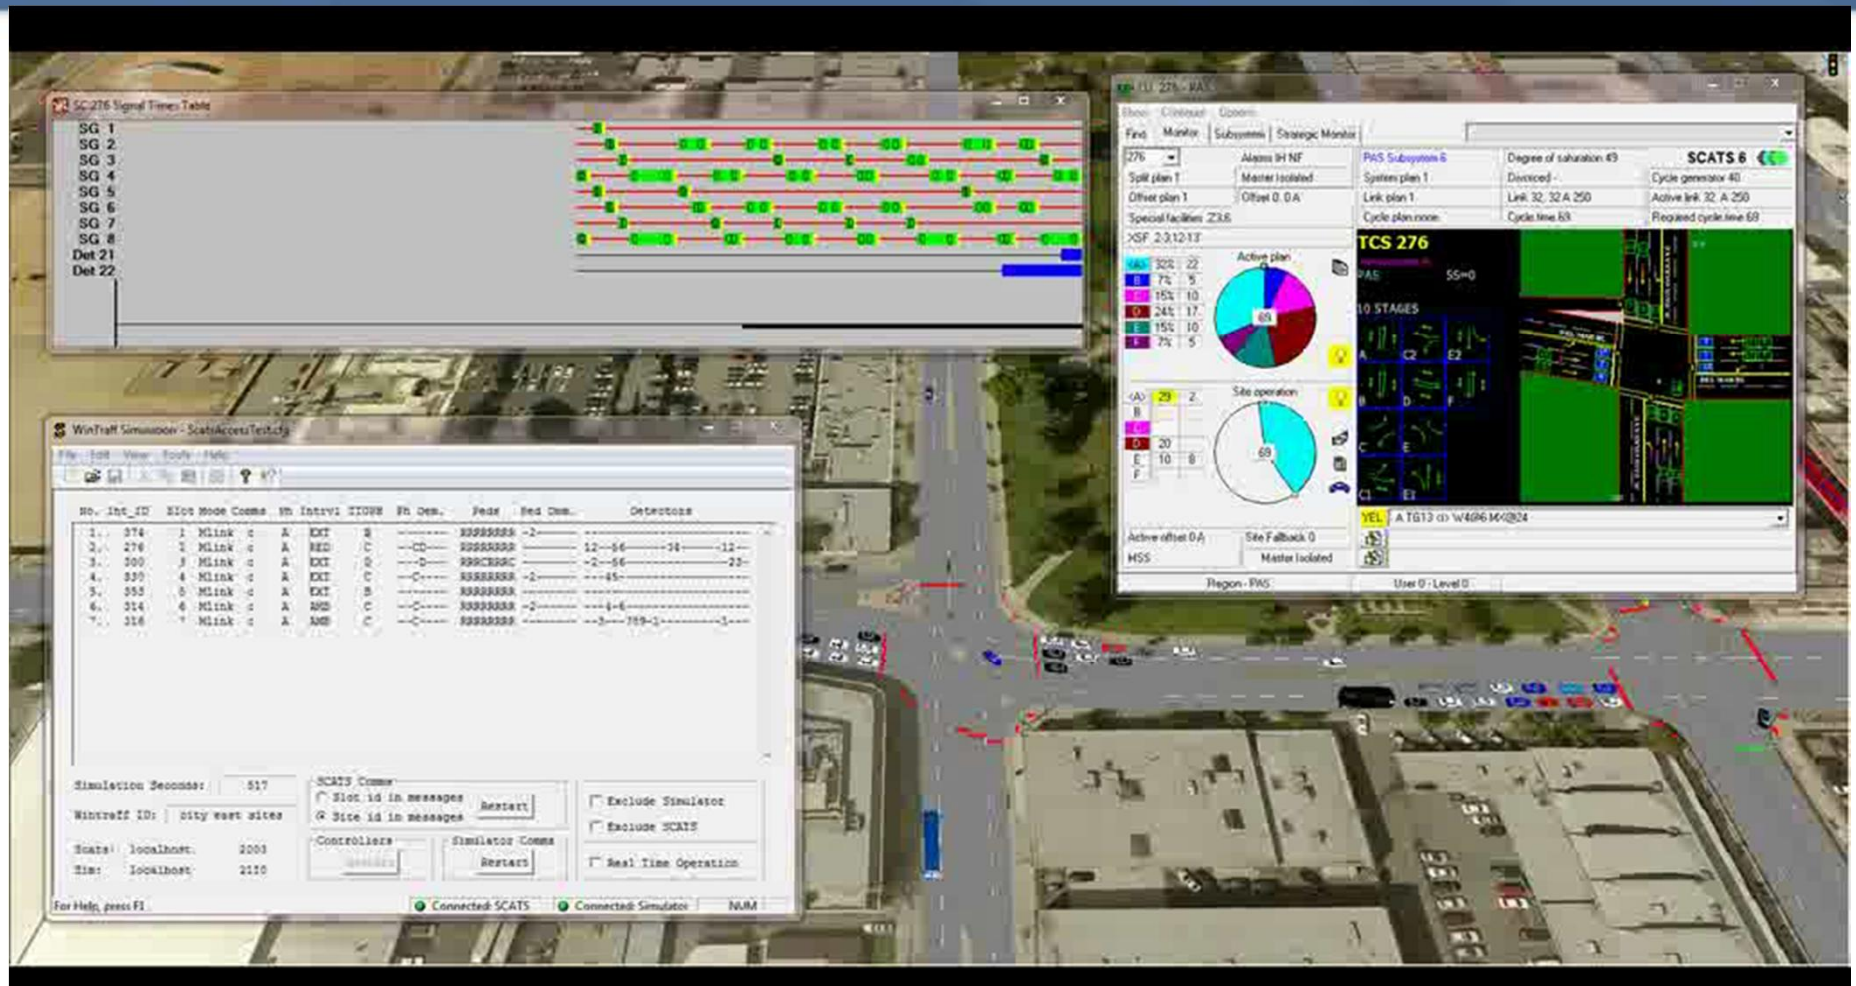

Department of Transportation

SCAT-Sim Module

Department of Transportation

Ongoing Projects

Department of Transportation

- **Transit Arrival Information System**
 - > Displays at stops, IVR, Web-based
 - > Real-time bus position
 - > On-time performance data by stop
- **Parking Guidance System**
 - > Real-time off-street parking availability
 - > Integrate with wayfinding signage
 - > Provide dynamic guidance
- **Emergency Vehicle Preemption**

PASADENA

Bluetooth Pilot

Department of Transportation

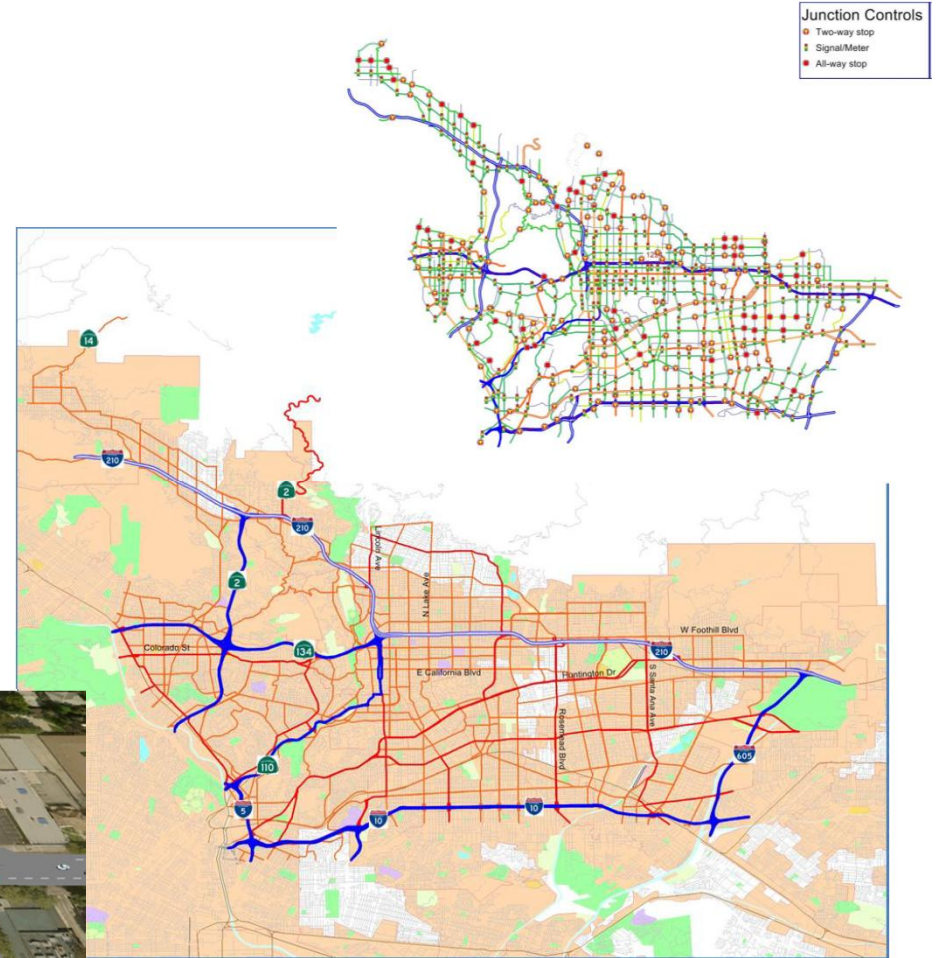

- Linda Vista Annandale Neighborhood Area
- Connector Streets
 - > Linda Vista accesses both I-210 and SR 134
 - > Linda links to Glendale
- Tracks travel patterns
 - > Effect of event traffic
 - > freeway to freeway bypass trips

PASADENA

DTA Modeling

Department of Transportation

PASADENA

Upcoming Projects

Department of Transportation

- ITS Phase II (in final design)
 - > 5 miles of fiber optic communication
 - > Signal synch
- ITS Phase III (design in FY 2014)
 - > 10 miles of fiber optic communication
 - > Signal synch
- Mobility Corridors – Rose Bowl Access System (design in FY2016)

Upcoming Projects

Department of Transportation

- Metro Gold Line Supervised Loop Design (design in FY 2013)
 - > Advance Gate Down Circuit
 - > Serial Traffic Signal Cabinet to LRT Cabinet communication
- Bicycle Detection at Signalized Intersections (design in FY2014)
 - > 4 bicycle corridors
 - > 38 signalized intersections

Funding Streams

Department of Transportation

- GRANTS
 - Federal Earmarks
 - Metro Grants
- Prop A and C
- Private Capital
 - Traffic Fees
 - Developer conditions
- General Fund (Gas Tax)

Importance of Master Plans

Department of Transportation

- Provides Strategic Blueprint by which system is expanded
- Fosters partnerships with all possible stakeholders from within and outside the organization for joint uses (fiber or video systems)
- Align goals to General City Policies and Objectives
- Allow agencies to compete well in seeking grant funds

Importance of Master Plans

Department of Transportation

- Traffic Control and Monitoring System Intelligent Transportation System (ITS) Project prepared by Meyer Mohaddes (ITERIS) in 2004 for about \$ 250k-\$300k
- ITS Master Plan Framework Update also prepared by ITERIS in 2012 will guide future expansion including consideration for short and long term effects of emerging technology

Leveraging Existing Issues

Department of Transportation

- Lack of 710 Freeway
- Metrogold Line LRT
- City's Location and Significance to Regional Mobility (Roadways Parallel to Major Freeways)
- City's General Plan

Issues – Lessons Learned

Department of Transportation

- Maintenance and Operation
- Staffing Issues
- Performance Metrics
 - > Adjusting to levels of expectation
 - > Travel Speeds vs. Reliable Travel
 - > System Monitoring
